

On behalf of the entire team at Sachkhand Convent School, I welcome you at the SCS family. Shaping your minds into critical thinkers and sensible citizens is one of life's biggest challenges and proper education can be one way to achieve that. If we are able to spark curiosity in our students, learning will be at its best. Our objective is not to fill them with so much information that they sink like lead but to arouse in them the desire to learn, to touch their mind so that they soar. We firmly believe that learning must be a joyous experience and every attempt is made towards this goal. The curriculum provides a blend of challenge, and creativity with ample scope for individuality and imagination.

Thought by **Albert Einstein** –

Education is not the learning of facts, but the training of the mind to think.

A meaningful equilibrium between Academics, Sports and Co-curriculars is maintained in order to bring forth confident, balanced, well-groomed and enlightened citizens.

Regards,

Dr. Ramesh Pareek
(M.Phil., Ph.D.)
